

## Married mode for long range receivers

### **Utilisation :**

- 1 → Your radio receiver must be ready to plug on launcher but unplugged for now.
- 2 → Start your long range transmitter and select the channel you want use.
- 3 → Enter on the MENU of you long range transmitter with simultaneous buttons: (M/A and +)  
If need, put your password or use a STAFF card.
- 4 → Press one time to button + to see « MARRIED MODE »
- 5 → Press to M/A button to enter on the function.

### **Married a receiver:**

Plug the receiver to launcher or put power ON then press the button (1 up to 8) the time to the launcher release.

That end for this one!

Continue with another launcher if need.

- 6 → When all married is finished, exit with M/A button then H button.

I you miss, cut power of receiver for 10 à 15 seconds then put power ON and press the good button to release launcher.

Tip if you want married a launcher number 9 up to 16:

With + or – button you change launcher (1 up to 8) OR (9 up to 16).
